Willie,

Please find attached the Work Plan for Addendum C of the Moose Lodge Road Additional Investigation that we discussed yesterday. Let me know if you have any questions regarding the Work Plan or the work to be performed. As we indicate in the Work Plan and discussed on our call yesterday, we would like to start the work after the July 4<sup>th</sup> holiday and can adjust the specific day to meet the schedule of MDEQ if you would like to provide oversight.

Best Regards,

**Subject:** RE: Kirk and PCA Property Investigations

Jim,  
I received your voicemail on Wednesday. I've been told you are out of the office and I have not been able to catch you on your mobile number.

In lieu of a conversation to discuss the matter, I will have to answer your request via email. As I understood your message, the deadline for the Kirk and PCA property investigations is upon us, but T&M on behalf of Meritor is requesting an extension because T&M would like to submit a work plan addendum to do more drilling across the railroad tracks in the stone yard area. The final resolution would be to tie all the investigations together into one report.

At this time, MDEQ does not feel this approach is appropriate. Although a final summary report would be useful to tie the many areas of interest together and provide conclusions, the Kirk and PCA properties were proposed as a single

stand-alone investigation, the results of which could then be tied into the bigger picture should there be something of value identified. As such, MDEQ is requiring the following:

- Submission of the Kirk and PCA property site assessment report according to schedule.
- Submission of a work plan to address the proposed additional sampling of the stone yard (may be proposed as an addendum to an appropriate work plan if such a document exists),
- Then submission of a stone yard assessment report which would include a full summary of findings from all the work conducted in the stone yard and, if appropriate, a regional summary demonstrating how the pieces fit together.

You also requested variance on a 10-day advance notice of field work activities. MDEQ would consider waiving the advance notice as long as appropriate time is allowed for review and approval of the work plan prior to field work activities. Should you need to discuss this matter further, you can reach me at my office line (601) 961-5731 or my mobile number (769) 257-9001.

**Subject:** Kirk and PCA Property Investigations

Willy,

We plan to start the site walk of the Kirk and PCA properties in the Moose Lodge Road Area, Grenada, MS on February 24, 2017 to keep on the schedule provided in the Work Plan. Based on this, I am providing a 10 day notification to MDEQ for the start of the work, although the Work Plan recently approved provides a similar schedule.

Please let me know if you have any problems with this start date. We are aware that you are interested in attending the site walk if possible and will keep you informed as the date gets closer.

Best Regards,

**JAMES PEEPLES, PE**
